- **Mary Lou Wiley:** Development Manager, CBE International

Cameroon, like many parts of Africa, is urbanising at a rapid rate. This brings both tremendous opportunity and significant challenge. How can the urban church in Cameroon position itself to respond positively to rapidly changing city environments and reflect God’s design for men and women to flourish and serve together? This conference will equip leaders and practitioners with the knowledge and skills to hold the gospel central, and work towards cities free of violence against women and children, where all can experience shalom.
